**NOxTech Ltd**  
Environmental Treatment Solutions

## NOxTech Acoustic Barriers

The NOxTech Acoustic Barrier is our latest sound reduction innovation.

Developed to combat noise pollution on industrial and commercial sites, the NOxTech Acoustic Barrier is used to screen off noise through the installing our specially developed sound absorbing barrier around the perimeter of sound producing sources.

We have a selection of Validated acoustic panel constructions, which offer performance tailored for low, medium and high frequency sound sources.

Our In-house acoustic experts can assist to selected the correct product for your application to offer the most beneficial acoustic performance for your installation as the most cost-effective solution.

Reduces up to 56dB  
@ High Frequency
