

Terre Haute, Indiana February 28, A.D. 2013

Bill,

People who think like us are the "mainstream," we are the true Americans who must carry on the tradition and principles that our revered forefathers fought and bled for in the American Revolution, in order to transmit to us, their posterity, the blessing of liberty. These principles were commonly referred to as the old whig principles, or republicanism. Republicanism's principles stand for a government as limited as possible, a government that is frugal with the least amount of taxation, government most at the local level, government that borrows only when absolutely necessary, individualism is more important than collectivism, government stays out of the peoples' lives as much as possible, honesty, integrity and a high standard of morals. These principles can longer be found in the governments within the United States.

Our Country is going to have to be restored by us right thinking Americans who hold these principles dear. We are the true Americans, who think for themselves and have not been deceived by our enemy's mass media. Our enemy, the monied interest, brainwashes our countrymen with ABC, CBS, NBC, Fox, CNN, MSNBC, all major newspapers, all major magazines, etc. Forming opinions for all those who cannot think for themselves and lack common sense and reason.

I think of Mao Tse-Tung the brutal dictator of communist China. From 1958-1961 Mao seized all the food from the Chinese people to use as currency for his military build up. Over 38

million people died. Millions more were tortured, killed or sent to prison labor camps. But millions still cheered and loved this wicked evil dictator. Why? Mao had control over the mass media, so he was able to keep the Chinese people brainwashed and kept them from the truth to what was really happening and the cause of it. These deceived Chinese were the majority, but that does not make their beliefs right. They were not the "mainstream," they were the destroyers of their fellow countrymen. The point is who ever controls the mass media or has the ability to get their argument, point of view or agenda into the minds of the non-thinking herd of humans, will be able to control that herd, and use it to their advantage. Our enemy, the money cabal, uses the tyranny of public opinion to get their socialist frontmen elected, like that scalawag Obama.

There will always be an unthinking herd waiting to be told what to think, unfortunately, these too are our enemies. No person in their right mind, with their faculties about them, would chose to live under socialism. We cannot and must not let the unthinking herd drag us to the dooldrums of socialism, as is, and has been happening in our country.

Socialism is the antithesis of republicanism. A socialist government is a despotic government. And fear is the first

principle of a despotic government. Men and women who fear do not have courage. Ask yourself, do the American People seem courageous or fearful to stand up against the enemy's government? Your answer let's you know what type of government is over us.

Samuel Adams said, "for whenever tyranny is established, immorality of every kind comes in like a torrent." Right vs wrong, good vs evil, the line of demarcation between these principles has been written as if by a sunbeam. There is no gray area. The legalization of homosexuality is upon us "like a torrent." Is this good? If not, then it is evil. This is a covert attack by our enemy on the family unit. The enemy used its mass media to bring about the acceptance of this immoral behavior. Such behavior is contrary to the laws of nature and should be abhorred by every right thinking individual.

The money interest is using its mass media to mold our country like clay before your very eyes. Slowly but surely to establish their despotic socialist state. Not only are we fighting against the tyranny of public opinion but we are also forced to contend with the tyranny of the public debt. The national debt and the taxes that naturally accompany it, have thrown such weight of power into the national government, that we must think this was not intended by our patriot ancestors. Under such conditions no man or woman can rightly or

truly call his property his own; and the danger of slavery is no longer merely theoretical. In every government the practice of contracting debt is certain to be abused. Right now the principles of republicanism are at the mercy of the forces of debt and corruption. And debt is inseparable from the question of taxation. The debt is used to reap a fresh crop of taxes, as we have just witnessed, with the enemy's government wanting another harvest of taxes, as we wade deeper and deeper into an ocean of boundless debt. The whole funding system is dangerous to liberty. Any government that relies for support on its creditors and not the affections of the people cannot last. As Thomas Jefferson said on August 19, 1821: "There does not exist an engine so corruptive of the government and so demoralizing of the nation [people] as a public debt." The pages of history let's us know that a government career of debt brings in corruption which spins off immorality and rotteness which always closes in revolution. The debt is going to bring on us more ruin at home than all the invading armies abroad, against whom the military are to protect us. Either the nation must destroy public credit or public credit will destroy the nation.

The enemy's government spending has put us in a hole. The first thing to do to get out of a debt hole is to stop digging. Only fraud could suggest and folly alone adopt spending your way out of debt. But yet, the enemy

uses its mass media to get the unthinking herd to vote in unscrupulous politicians who promote such a course. Like vultures, the enemy preys on the waste of public money. We are seeing our country become under the yoke of force and fraud, the natural consequences of corruption.

We, the patriots with correct reasoning, are the only thing that stand between our enemy and liberty. As we continue to weaken under the increase of poverty and taxes, a window of opportunity to defeat the enemy continues to narrow. We must continue to exhaust all peaceful remedies to redress the loss of our liberty. Taxation is not liberty. These are trying times we are living in. The ends of our government have become perverted, for it has not fulfilled the ends for which it was instituted; and now public liberty is manifestly endangered; and once all means of redress have become ineffectual, we may and of right ought to throw off this government and institute a new one. This final appeal to the Second Amendment was anticipated by our learned founding fathers. As Patrick Henry said on June 5, 1788, the Second Amendment is "the means of defending our rights; or of waging war against tyrants."

Well that is all I have to say for now therefore I will end it here by simply saying

Take Good Care
