Well, well, well,

Good news on the Ranchers' show trial in Nevada! I was reading the Wall Street Journal and saw this tiny little article the size of a playing card. It was super vague and just said "2 convicted."

I thought to myself "If the government had won the case, the press would be celebrating with a frontpage victory lap." So whatever happened must be good since the propagandists don't want to elaborate on it."

Then today I got a letter from Angela Clemons telling me that there was a hung jury and there will be a new trial in June.

It's not uncommon for a jury to be stacked with informants in a high profile case like this. I've seen it many times with CMU prisoners. Remember, the courts are in show-biz. If a magician in Las Vegas "randomly selected" a volunteer from the audience to come up and be part of the show, wouldn't you have a pretty good idea that the "volunteer" was a plant? C'mon folks. Let's not be gullable. What are the odds that the people in power are

going to leave their continued livelihood up to chance? They're keeping that power by hook or by crook.

Once you realize that the Mafia got into the government and infected it with its way of thinking and acting, the system starts to make sense. Also, the spy agencies like the CIA perfected their own bag of dirty tricks for rigging systems and co-opting governments in foreign countries. Then, once they saw how easy it is, they just came back home and did it to their own country.

The more documents I get from FOIAs, and the more sealed cases I read from CMU prisoners, the more I see that literally everything about politics, police, and courts is fake. We are being controlled by the show that's all around us. For those of you who are awake, there are at least 2 or 3 more levels of awakensness when you find out just how involved the Feds are in preventing organic opposition, and creating synthetic opposition.

There were some organic opposition leaders in the Ranchers. That's why the Feds ran in all their synthetic counterfeit opposition leaders. That's also why they aggressively prosecuted everyone.

Why do you think protesters can literally burn Ferguson to the ground and nobody gets in trouble, but some Ranchers engage in non-violent constitutionally protected 1<sup>st</sup> and 2<sup>nd</sup> Amendment activity and the Feds try to lock everyone up for life? It's because if you're not part of their show, they aren't going to let you exist.

Please listen close; this entire government constructed culture we all grew up in is nothing but lies and deceit and pagentry. It can trick the mind, but the heart is not so easily fooled. So everyone already knows the truth, they just don't consciously know that they know it, because it's in their heart not their mind. Now here's the key point: The most revolutionary act of subversion one can commit against the fake system is to simply be authentic in all that you are. Because once people have encountered the real deal, they will recognize the fakes by comparison. Real people will be the fake system's undoing.

There is hope. It literally only takes three or four people who are authentic through-and-through to change an entire culture. Why? Because ridding the world of candles really is as easy as introducing the lightbulb.

So to the Ranchers, to all the patriots watching this unfold, and to everyone with a heart that knows somethings up, just be authentic. That's all you have to do. But it's not easy.

There's no point in trying to be honest and authentic to the rest of humanity, if you can't be honest and authentic to yourself. In fact, it's impossible.

You have to start with the hardest person on earth to be real with: yourself. But if you can do that, everything else is automatic.

It's really simple, but really hard.

A few genuine people really can put a whole fake system out of business. So don't lose sight of that. Be real, and then let nature take its course. Freedom is making its comeback.

"You'll swear you've heard it before as it slowly rambles on. No sense in bringing it back 'cause it's really gone."

We're going to be ok,
