Effects of structural changes in your new home:

It is normal for a new house to settle after construction. This settling may affect your kitchen cabinets and counters. Doors may go out of adjustment and caulking joint may separate. Doors can be re-adjusted by following the instructions included in this package.

Ambient environment:

Smoke, sunlight and humidity can cause damage to cabinetry. High humidity may cause doors to warp, low humidity may cause shrinking or cracking.

- In the winter, keep the relative humidity in your home in the range of 30-45%. Lower humidity levels may affect your health and cause things made of wood to shrink. Excess humidity can cause condensation on windows and damage the surrounding wall. When using a humidifier, follow the manufacturer's instructions.

Relative humidity levels should not exceed 60%

LIMITED WARRANTY CERTIFICATE

Hardware and Cabinets limited Life time/ Doors and panels 5 years

Synergy warrants to the original consumer purchaser that Synergy hardware and cabinet products will be free from defects in material and workmanship under normal use. This warranty is only applicable to Products used in residential applications and is not transferable to subsequent owners.

Should defects in material or workmanship exist during the applicable warranty period in any Synergy Product, Synergy will elect at its discretion to either repair or replace the defective material. This warranty covers only parts and materials of the Products supplied by Synergy. Not covered under this warranty are flooring, tile, sinks, accessories, counter tops, appliances, plumbing fixtures, etc. or the costs, including labor, to remove and reinstall materials and related components such as fittings, appliances, etc.

This warranty will not apply to cabinets damaged by misuse, neglect, abuse, acts of God, exposure to moisture, exposure to extreme temperatures, normal incidental deterioration such as nicks, scratches, abrasions and natural aging whether resulting from the effects of normal wear and tear or abnormal use. Natural woods may vary in color, characteristics and exhibit subtle changes as they age.

Cabinet colors may darken or lighten over time. Sunlight, smoke, household cleaners and other environmental conditions may also affect the color match over time. These variations are considered to be the nature of the material in relation to their environmental exposure and are not covered under this warranty. Synergy reserves the right to alter design, specifications and material without obligation to make similar changes to Products previously manufactured.

If components are replaced, Synergy cannot guarantee that the finish of these replacements will exactly match the finish and appearance of the components in the residential application. This is due to the changes that occur during the woods' natural aging process, affecting its color and grain.

Cabinet Doors and Kitchen Cabinet Panels 42" and over carry no guarantees against warpage. Any door or panel which has warpage of less than 1/4" is not considered a defect.

This warranty sets forth your sole and exclusive remedy as a warranty holder for any non-conformity in a cabinet Product. In no case will Synergy be liable to you or to any other person for any consequential, special, or indirect losses or damages of any kind.
