

IMPERIALTUS

OPERATIONAL MANDATE AND VISION

VERSION I - 2017

CONTENTS:

- 1) Statement of Purpose.
 - 2) Mission.
 - 3) Fields of Operation:
 - Socio-Political.
 - Education.
 - Working to undo the vices of contemporary culture.
 - The global financial system and debt.
 - Politics.
 - Scientific endeavour /applied sciences.
 - Academia.
 - Sustainable Energy.
 - Environment.
 - Food health.
 - The Arts.
 - Music.
 - Books.
 - Race realism.
 - Spiritual awareness.
 - Creation / Purpose of Life / God / Religion / Theology.
 - The Sacred Balance and the Great Key.
 - Liberty.
 - Individual, Family & Communal Security, National Security, and Cultural Security.
 - Research.
 - 4) Marketing.
 - 5) Membership Body and Management Structure.
- ❖ As our organization advocates Truth as its foundation; its mandate, operations, functions, and dictates may be subject to amendment from its membership body in the consideration of further insight, scientific information, or other information in respect to the truth.

STATEMENT OF PURPOSE

IMPERIALTUS exists to advance, evolve, and to protect individuals from any externally implemented or self-imposed processes of degeneration affecting the individual, family, community, state, culture, and species, through its means of existing to serve as a bastion for truth, culture, research, philosophy, policy, science, defence, theology, investigation, and practices, in association with the virtues of western civilization in order to gather and protect information, peoples, and resources for the purposes of preserving, solidifying, and propagating the order to protect and advance such civilization under the light of creation.

MISSION

- To exist, thrive, and advance in a proper and healthy state.
- Growth of consciousness and self-awareness.
- To uphold, defend, and advance the virtues of western civilization.
- To lead from confusion toward understanding.
- To honour and protect the sacred/holy family unit.
- The Proper management of wealth.
- To Place no determination above Truth.
- Work to develop ourselves to the degree that we may attain the capacity of right judgement, whereby we can propagate what is good, and distinguish what is not.
- Respect laws and customs that are geared to the true good, and shed light on condemning others that are not.
- Establish grounding, footing and foundations on Earth, balance ourselves and the planet, and work toward qualifying as a people for advancing to interplanetary evolution.
- Advance and flourish broadly through various expressions which stem from the realization of our vision, and honour the sacred principles of our lives for generations hence.

Our path is of self-realisation, integrity, the truth, and evolution. In order for this path to be sustained, it must follow precepts and directives, be walked by its members, and be guarded by a great shield and light - lest mankind be misdirected and fall further into confusion, degeneration, darkness, and chaos.

FIELDS OF OPERATION

SOCIO-POLITICAL:

We aspire for the virtues that have served as a leading light across the history of western civilization that have protected and lifted those whom create such a state. In protection of upheaval from corruptive forces from within, and externally - we stand to uphold these virtues in the defence of our integrity and to allow for our development instead of our degradation.

EDUCATION:

We aim to educate our members as comprehensively as they may be willing or able to be educated. Following this, we aim to extend our vision as pervasively as possible – across online networks, channels, and media, into communities, schools, universities, scientific fields, corporate culture, wider culture, government agencies, and politics. And of utmost importance is the correct education, protection, and guidance of younger and future generations.

We can offer programs to conjoin with the curriculum of state-run and/or private school systems, and through other mediums of education including webinars.

Organization of knowledge and information, and the protection from misinformation, chaos, distraction, and vice in their various manifestations.

Knowledge is not meant by nature to be withheld or commodified as to harbour power – it is meant to be diffused and distributed for the self-realisation and evolution of a people.

We wish to bring clarity to the confusion rife within life.

WORKING TO UNDO THE VICES OF CONTEMPORARY CULTURE:

Many western cultural virtues have been debauched throughout contemporary culture. There is explanation behind all of this, which will be explored and uncovered in our material.

A grave reality is the brain-deadening effects on current and future generations, which decays all manner of moral, spiritual, and cultural advancement, and allows the descent into darkness and mass slavery by way of socially-promoted degeneration.

Mainstream media presents a torrent of artificial distraction far removed from the grounds of reality. Rampant consumerism ultimately sells out one's own children and forthcoming generations, is reinforced by cultural norms and pressure, and is under the guise of the pursuit of profits.

Contemporary models and systems peddling ignorance and deceit promote falsity, illusions, and propagate debt, thereby maintaining pressure on vices and the descent of mankind. Much of the widely-cast web of advertising and consumerism feeds off the weak-minded, serves to line the pockets of profiteering manipulators, and promotes debt through the front of the artificial glitter of materialism.

Much of contemporary culture in the west has turned from the direct and conscious acknowledgement of the good intention of life. We aim to make this aspect in life a part of day-to-day conscious awareness to all those that choose to be a part of it. In the face of the social bombardment of endless layers of distraction, we seek to ground and elevate our members, and humanity.

Consider that peoples of the west are pervasively indebted, bombarded with junk, guided and pressured to propagate junk, caught up in greed, brainwashed, consuming cancerous substances, enabling immoral behaviour, revelling in media delusions, creating too much waste, mismanaging themselves and their societies and environments, being forced to live and work among peoples not of their conscious election, and are being sold out as a commodified unit of value to be squeezed out through a dark system.

Virtuous principles are being drowned under the push of globalization, money, false ambitions, and under governments that are under the influence of the interests of international finance. It has been identified that the forced dilution of culture through an agenda behind strategic aspects of globalization, widely interpreted and sold to various people as a good agenda - is in fact disabling in ways which must be addressed.

The mass of what voters and consumers believe to be true is controlled by those who control the channels and voices of the media and popular culture. And in its current state, it is a recipe to literally drive the world insane, to uproot reality, to enslave people, and to detach

mankind from God. The degeneration of humanity is an act of darkness, it is an attack on the soul, and a cage against higher humanity.

The light and strength within western mankind dims when he is saturated. Western man has grown saturated in his comforts, and naturally his strength within begs to be reignited in order to thrust humanity upward and onward. He cannot and should not weaken and fatten any further, as his mind will further become hijacked by lesser forces and darkness, and thus the world will fall. He must take ownership in himself and reignite his strength to move mankind upward from chaos, degeneration, darkness, confusion, sin, and upheaval.

THE GLOBAL FINANCIAL SYSTEM AND DEBT:

The global financial system in its current state is not sustainable. It is not an eternally vested right nor is it a naturally divine system and is thus susceptible to imbalance and corruption, as it is today. There are other alternatives which may be transitioned toward to ensure the prosperity and protection of future generations, which we will present in our content and material.

Proper and well-functioning humanity is not meant to be living under a system of global debt. This reflects a lack of self-responsibility within individuals, and a deep and pervasive exploitation of this lack of self-responsibility. It is the exploitation of this lack of self-responsibility that spreads darkness within and over humankind and allows for the imbalance to continue.

Culture and principles, and the foundations of society and the family, have been sold out to the modern god of economics and international banking, globalization, and profit seeking. Western Governments have succumbed to playing to this tune and will further lead people away from the integrity of western civilization and down into abysmal futures for coming generations.

POLITICS:

We seek a presence within Politics across as many states and nations as possible, in order to gather social momentum and interest toward our vision and our future.

SCIENTIFIC ENDEAVOUR / APPLIED SCIENCES:

We seek a presence within and across the fields and applications of science, in order to bring further credit to our vision.

ACADEMIA:

We seek a presence in influential places within Academia, in order to bring further credit to our vision.

SUSTAINABLE ENERGY:

We actively seek to work to promote industries including electromagnetic energy generation, solar power, geothermal, tidal, wind, and other sustainable technologies and their applications, which must necessarily be transitioned toward in order for the world to survive and to advance.

We contrast these technologies with the negative externalities of the fossil fuel industries, and we demonstrate the benefits and the waste and cost reductions of sustainable energy technologies in their applications to households, communities, and the world.

We will build relationships, links, and contracts with organizations, individuals, businesses, and pursuits in these fields in relation to our vision.

ENVIRONMENT:

We seek clear air, clean and uncontaminated water, good healthy soil, trees and plant life, the widespread availability of vegetables and fruits, and the planting of good seeds as broadly as possible.

Minimising of waste, and working toward the eventual conversion and transition from industrial-age fossil fuels to space-age sustainable energy production and the harnessing of electromagnetic energy.

FOOD HEALTH:

We advocate for the utmost care and conscientiousness toward the sources of fuel for the body. In order for the physical vessel to function at levels reflective of the conduct of this organization, food sources must be healthy enough to allow for the channels of the mind and body to function harmoniously and not be constricted by toxins, excess fats, carcinogens, and other unhealthy by-products and foods. We shall offer comprehensive food and nutrition information and guides.

THE ARTS:

Reality is the ultimate art, and we wish to keep it in good shape. We will have a presence in statecraft, the sciences, innovation, defence and military, churches, trades and industries, agriculture, spiritual movements, and across the arts that promote, enhance, and decorate our vision.

MUSIC:

We will promote, support, and create a forum for classical, powerful, serene, traditional, and beautiful music - to shine as an example of the emotiveness, talent, beauty, complexity, and strength behind our spirit and expressions. This will incorporate baroque, renaissance, and other variants of classical music, various traditional European music and other European folk music of deep substance, contemporary masculine expressions as found in high quality metal, beautiful feminine expressions in music, choir music of the Church, and others.

This will stand in contrast to the degenerating contemporary pop and other bastardised music genres as pushed and consumed across the mainstream in modern culture.

BOOKS:

We will work toward the collection and promotion of constructive information, material, and books - spanning history, the sciences, philosophy, theology, arts, architecture, recreation, horticulture, military principles, discipline, child-rearing, physical fitness, healthy entertainment, and other categories.

RACE REALISM:

We honour Truth, and the disciplines that give rise to virtues, before we honour cultural sympathy, corrupt social sentiment, naïve policies, and undermining narratives.

The contemporary western-liberal-political narrative of racial diversity being a strength is wishful thinking at its worst, which plays off of emotional naivety, sympathy, pacifism, and the delusion of total equality, and is in fact part of a deceptive globalist scheme of manipulation for the end purposes of rounding down as many people as possible into pacified units of value or currency – devoid of their sovereignty, race, and uniqueness.

The obvious yet meddled truth is that racial groups share intrinsic genetic characteristics that work best when members of the same racial group are living together and working in service of each other, and their integrity is best served and honoured when this environment is promoted. Globalization and the curiosity for exploration, seeking profits, and experiencing and competing with other cultures has challenged this stability and has sought to develop a new global-world-paradigm in order to maximise the value of this – yet this value also has a cost and a highly destructive side.

To force the mixing of all racial groups is to destroy their unique identities by forcing behaviour down to a baseline common-ground wavelength, and essentially diluting real individual spirit and character.

Whenever attempts are made to incorporate racial groups, even when well-intentioned, there are always problems that arise.

The concentration of like-qualities among racial groups aids in their self-awareness and honouring their own selves. Cultural melting pots dilute identities, are destructive, weaken, confuse, create imbalance, and are preludes to slavery, conflict, degeneration, or war.

Honouring racial self-sovereignty is true multiculturalism – for each race to honour the responsibility to and for itself – this is the key to evolution.

This movement is of a Western/European basis, and its vision, spirit, progress, and ethos is a product of its history and insight. In defiance of its weakening, and to clarify the reality that western European peoples represent only 10% of the global population, we wish to unite and concentrate this cultural awareness, in order to thrive in integrity - as great accomplishments will occur through this. We encourage other cultures and peoples to honour their heritage also, and we encourage them to establish their own variants of this organization as suited/adjusted to their nature and culture.

SPIRITUAL AWARENESS:

We promote the personal development of increasing levels of consciousness and self-awareness that necessarily incorporates a spiritual awareness. We share a collection of wisdom and views as discerned from the recordings of figures including Christ, the Buddha, great philosophers, sages, yogis, some avatars across recorded history, and some contemporary spiritual teachers and guides.

We wish to lead mankind into his own light – and thus allow this light to manifest outward, to bring it upon himself and the world – through the light within himself, and honouring such light in life. We wish to lead man and the planet out of chains and turmoil, knots, suffocation, pollution, disease, distraction, hell, and destruction - and into harmony, evolution, spirit, awareness, creativity, divine order, balance, and evolution.

CREATION / PURPOSE OF LIFE / GOD / RELIGION / THEOLOGY:

Concerning the connection to sacred principles, creation, divine order, and aspects of God - we promote a Truth-based paradigm in revealing its workings – incorporating an amalgamation of some of the deepest and most lasting observations gathered across history. We advocate some core truths within the Holy Bible, aspects of Taoism, Hermetic Law / Natural Law, aspects of Darwinism and natural selection, aspects of Norse-Greco-Roman Mythology, and aspects and evidence of extra-terrestrial disclosure - and we bring it all together to form an immensely enlightening framework and basis for reality.

We identify the causes of deceptions away from the Truth, DNA, and all forms of degeneration. Humans have been given the Word of Life – yet have failed themselves and have been deceived away from it. We highlight this word of life as our core tenet, existing within us and as given to us for eternity, and we identify the counter-movements against this and identify how this is responsible for the plight of man from harmony and evolution.

THE SACRED BALANCE AND THE GREAT KEY:

We present the true middle-path and the related balance of life. We explain the sacred structure of the brain, the body, and the mind in its ability to function in a fuller state of awareness and balance, and live in harmony and concordance with reality.

In opposition to this exists the manipulation of perception, constriction of the mind, imbalance of the brain, and physical imbalance - resulting in the creation and experience of a life and a world rife with conflict and imbalance.

We present the unification of the universal duality – uncovering the real middle-path – as something that exists to be realized, and not to be hijacked, reserved, or manipulated by dark forces as it has been. We believe that this level of self-awareness and universal awareness must eventually and necessarily be known to people in order to ensure a ‘self-responsible, self-aware, self-empowered, earned, and embodied’ destiny for a people. It is not to be seized by the few, but to be available to be taught and embraced by as many as able.

LIBERTY:

We recognise that true human liberty is achieved, earned, and realized only when life follows in accordance to the principles which allow for it. It exists within the spirit and mind of people and has been issued into the world only when a degree of knowledge and self-realization allow for it – and it ceases to exist to the degree that people do not adequately develop knowledge of it within themselves.

INDIVIDUAL, FAMILY & COMMUNAL SECURITY, NATIONAL SECURITY, AND CULTURAL SECURITY:

These areas will develop as our organization takes root, amalgamates, and grows. We can only determine our degree of security to the degree that we successfully secure our development.

RESEARCH:

We strongly encourage research by members into any and all fields of interest, with findings to be channelled through the relevant field of operation, to allow for further expansion, grounds, legitimacy, and success of our organization.

MARKETING

- Market website and media/video content through online channels, social media, and forming affiliations/associations with similar-interest groups.
- We will build relationships, links, and contracts with companies and organizations aligned with aspects of our vision.
- We will depend on our members to strategically introduce and spread our organization to applicable groups and individuals.
- We will host links on our website in connection to informative channels, videos, books, resources, organizations, companies, businesses, and information in association with our content and vision.
- We will engage in the widespread distribution of posters and flyers throughout strategic locations - including community noticeboards, university noticeboards and strategic locations on a campus, within schools, government and corporate office noticeboards, to be mailed to influential individuals, and across other suitable locations. We recommend laminating any posters that are to be placed in outdoor environments to extend their longevity.
- T-shirts, banners, stickers, pins, flags, and other such merchandise displaying the logo/ emblem/ title will be made available through our website.

MEMBERSHIP BODY

IMPERIALTUS is comprised of a membership body and administrated by a directorship group of its members.

The only requirement to early-stage membership is acknowledgement of our vision (in some or in all of its aspects/scope). Other requirements may be drawn up in due course.

For the youth: We are a good resource and structure to help shape and properly educate the youth to strong and thriving futures.

University Students: A crucial environment for curious minds to embrace our vision, spread its presence, and gather momentum.

Tradespeople: We are a friend and brotherhood to all trades and workers.

Military, Police, and Emergency Services: Our vision can serve as a source of inspiration for members of the emergency services, Police, Military, Ambulance services, and others alike, and we seek for a strong presence within.

I.T Professions: Vital to ensure the computing environment is correctly maximised and advanced.

Engineers and Architects: Vital to ensure the structural integrity of the built environment within our towns, cities, and nations.

Women and Females: We encourage and support females to acknowledge our vision and to join in our journey. We encourage women to rise to the realization of their fullest and most natural state and balance, and we give our full support to females on this path and we stand to support them with all of our hearts. We are fighting to save misguided women, broken marriages and families, and we aim to empower females in the most balanced sense.

Scientists: We strive to advance science and alongside scientists in the right direction.

Churches, Christianity, and Religions: We may establish and further ourselves as a religious identity to the degree that people may demonstrate need of. We will not shy from identifying and exposing misinformation or mistranslations across religions, but otherwise we welcome all religious denominations to consider our information, and we seek to add perspective to religious ideologies by adding firmament and deeper information.
