

## Before & After from the Field

### Town & Country Plumbing and Heating

Submitted by John J. Romero Jr.

These installations are retrofit projects in two different houses converting old boilers to high efficiency gas condensing boilers. Town and Country Plumbing installed a GB142/45 and a GB142/60 gas condensing boilers in these conversions.

Jason sent these pictures to demonstrate how one can take an old system out and create what he likes to say is art work with a great Buderus system.

Town & Country Plumbing and Heating operates from the South Shore of Massachusetts. "I have been very fortunate to have been mentored by Bosch/Buderus South Eastern area manager Dan McDermott. He is a great guy who is very knowledgeable and passionate about what he does," says John Romero Jr.

Great work John! Thanks for sending this along, and we hope you enjoy the PS-10!

Have a successful installation?

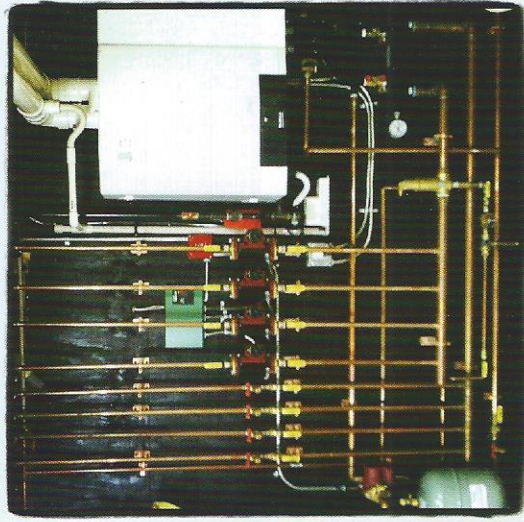

**Let us write about it!**

*No investment in promoting your business pays off as much as a successful installation and a satisfied customer. If you can provide some details and images about a recent installation project, we'll create an article or case study which may be published on our website or in a future edition of CC. For an approved story you'll receive a Bosch PS-10 power tool!*

Old oil fired boiler that was operating at 81% efficiency. The new Buderus GB142/60 is running at 91% efficiency and the home owner received a total rebate on the system of \$1900 from local and regional incentives.

The old system was a Burnham 84WFH which had a leak and was running at 82.5% efficiency.

The new Buderus GB142/45 is running at 92-93% efficiency and yielded the home owner a rebate from local incentives of \$1900 on the complete system.
