

Morgan's Mutts Rescue Newsletter

February was not a kind adoption month! We had ZERO adoptions! But we did watch Amelia become healthy & happy! We also took in another stray with health issues but she too is on the road to recovery!

Getting healthy!

Amelia was a stray who had eluded Kathy, the woman who was trying to save her, for several days. She contacted me after about a day and a half of trying to gain her trust. She knew that her little friend Felicia would be easy to catch as she was much friendlier and healthier! So together we were able to catch Felicia quite easily but Amelia was so untrusting that it was going to take time. The problem was, how much time do we have. She was so emaciated and full of ticks and parasites that we were afraid she wouldn't make it much longer. And to top it off it started raining and became quite cold, especially at night. Day 1 was unsuccessful but we could see in her eyes that she wanted so bad to trust us! She would come only so close and then walk away terrified. On day 2 I spent the morning with her again trying to gain her trust with food, and again she wanted so bad to trust me but just couldn't! While I tended to the rescue dogs, Kathy went to see if she could fare any better. Well she did! At about 5:30 pm, Amelia decided it was too cold out to spend another night in the rain and just walked into the back of Kathy's minivan! She brought her here and I carried her inside to a nice warm quiet crate. She began her healing on the outside and inside..

Who got rescued in February?

Momma Roxy!

Momma was a stray who had been seen for months on and off just a few miles down the road from us. The girl who called and asked if I could take her, just couldn't stand her being on her own any longer as she was so sweet and in need of vet care. So... of course I took her to originally hold her until Tuesday when Animal Control opened again. But her owner showed up and signed her over to me. Momma was an absolute doll but desperately needed vet care. She arrived on 2/20/17 and we were able to get her seen by our vet on 2/22/17. She had a list of issues starting with intestinal parasites, kennel cough, conjunctivitis in both eyes, severely bowed and deformed legs, and she had been a momma "several" times! She had ticks all over her And was extremely malnourished. She also tested positive for Lyme disease..... But she too is healing on the outside and inside... I don't have many pictures of her as she is so excited for company that she doesn't stay still long enough for a picture!

Yukon returns from foster home....

YUKON learned a lot while in his foster home but we also learned a lot about him too. He needs a doggie playmate and room to run! Leash walks and even hiking just didn't give him the exercise he needed to get out all that energy! He did however learn all his basic commands as well as behaving inside a home! He did awesome but apartment life is not for this big boy! Chandler will be back to foster after spring break! Who will go to a foster home next?? HmMMMM!

Upcoming Events!

Yep! We will be there! Saturday April 29th! Call or text if you are interested in helping out! We need 6 volunteers!

Saturday, May 6th! Farmville. Not sure of the time yet but we will need help with setup and during the day! 6 Volunteers needed!

Amelia
Day
Festival

Saturday, May 13th from 9-5. Setup around 7-7:30am. Need 6 volunteers during the day and 1 or 2 for setup!

Our Mutt Walkers kept walking during a cool and rainy February! Thank you

Did you know that there are only a few over the counter medications safe for dogs? Here are a few!

Open daily by appointment! 804-551-2908
