

Habi-Mats

“An Aquatic Habitat Platform”

- **Creates habitat for Aquatic Organisms.**
- **Recreates woody riffles.**
- **Creates places for Benthic Macroinvertebrates to nest and hang on during high flows.**
- **Traps leaves & small sticks (i.e., useable organics) for organisms that can be used for food.**
- **Can be placed on the bottom or floated to support organisms.**
- **Provides additional habitat types when combined with HabiTubes.**
- **Used to cheaply simulate root-wad habitat.**
- **Uses wood less than 3 inches in diameter.**
- **Adds woody habitat to stream in a cost effective way.**
