

## Mobile Computers

CN75/CN75e

Ultra-rugged mobile computers with a no-compromise design providing the power and performance required by today's field service and transportation workers.

CK75

Smaller and lighter than others in its class, and optimized for warehouse and distribution environments with industrial-grade materials.

Dolphin CT50

For transportation and logistics, this intuitive device offers cutting-edge wireless technology, multiple data capture capabilities and superior durability.

Dolphin CT50h

This clinical smartphone empowers clinicians to deliver an exceptional patient experience across the continuum of care.

Dolphin 99EXhc

This healthcare device features a disinfectant-ready housing, cutting-edge wireless technology, multiple data capture capabilities and superior durability.

CN75/CN75e

Ultra-rugged mobile computers with a no-compromise design providing the power and performance required by today's field service and transportation workers.

### Tecton CS

Light enough for intensive picking, yet tough enough for extremely cold environments – as low as -22 degrees.

### Dolphin 99EXni

A high performance, non-incendive device for safe operation in hazardous industries, including chemical, oil and gas, life sciences and utilities.

### Ci70

Best choice for workers in the chemical, oil and gas, and pharmaceutical industries. Features the highest number of global approvals for hazardous environments.

### Thor VM3

The industry's most capable full-size vehicle-mount computer, built for the toughest DC environments, manufacturing facilities and freight operations.

### Thor CV31

Our most compact vehicle-mount computer, this powerful device supports Vocollect voice-directed workflows while minimizing driver line-of-sight obstruction.

### Thor VM2

A mid-sized vehicle mount computer that's ideal for warehouse, port and yard process automation, and delivers rapid value for your workflows.

### A730

Ideal for voice-directed DC workflows that need occasional scanning, this mobile device integrates voice and hands-free scanning in one ergonomic solution.

### A720

Ideal for workflows with Vocollect voice solutions needing both Bluetooth wireless and wired headsets and certified wired peripherals

### A710

This wireless-only voice mobile device is for workflows, including vehicle-based workflows, using Vocollect voice Bluetooth-enabled headsets and peripherals.
