Mobile Computers

EF501R

A powerful octa-core processor ensures higher level of performance that can run multiple applications with minimum power consumption. Running Android 7.0 Nougat, the EF501R provides ultimate on-the-go productivity packed with enterprise-focused features.

EF501

A powerful octa-core processor ensures higher level of performance that can run multiple applications with minimum power consumption. Running Android 7.0 Nougat, the EF501 provides ultimate on-the-go productivity packed with enterprise-focused features.

EF400

The EF400 is a pocket-sized touch mobile computer with 4" display for maximum portability and easy grip, making it ideal in field mobility applications. Built for harsh environments with protection against water and dust and multiple drops from 1.8 meter.

EF500

Bluebird's new flagship 5-inch mobile computer based on the latest touch screen technology perfectly combines premium enterprise class mobility and rugged industrial design. Ideal for use in transportation as well as retail with ability to handle rain, bright sunlight, and multiple drops and bumps.

EF500R

Bluebird's most rugged 5-inch touch mobile computer based on the latest display technology. Perfectly combines premium enterprise class mobility and rugged industrial design for use outdoors and in harsh industrial environments.

SF550

5.5 inch touch computer that pairs the sleek, Bezel-less design of a consumer smartphone with enhanced durability and enterprise functionality. Ideal as a store manager device and for use in non-industrial environments.

BP30

Versatile, fully rugged 5-inch touch mobile computer for Android and Windows with an optional built-in MSR and support for contactless payments.

BM180

BM180 is a 5-inch touch computer and the perfect combination of durability and sleek consumer styling, available for both Windows and Android. An optional built-in MSR and support for contactless payments turn BM180 into a mobile POS device.

HM40

HM40 combines sleek, compact form factor with durability and full-feature data capture capabilities at an affordable price. It empowers workers with real-time data and barcode scanning so they can get the job done, no matter where they are.

HM50

Rugged touch mobile computer, ideal for use in field service, route accounting, transportation, and other applications that require a durable device and high performing bar code scanning.

BIP6000

BIP6000 is the world first rugged mobile computer integrated with four different types of RF technology including HSDPA, Wi-Fi, Bluetooth, and RFID reader capability and it greatly fits for mobile ticketing in transportation and DSD route accounting in FMCG industries.

BIP7000

From the sales floor to the backroom and even on board on the delivery truck, BIP7000 offers durability and comfortable single-hand operation paired with high performance barcode scanning.
