

Enhanced Xenon 1900h & 1902h

Best-in-class healthcare organizations looking to improve positive patient ID and meds admin workflows have a longstanding preference for Xenon™ healthcare scanners. The next-generation Enhanced Xenon™ healthcare scanners now offer features specifically requested by clinicians to further improve patient comfort and common clinician workflows.

SF61B Pocket Scanner

Small enough to stow in a smock pocket, the SF61B healthcare 2D pocket scanner travels with you. Access it quickly or keep it securely tucked away when you need unencumbered use of both hands. Despite its small size, the SF61B scanner offers performance typical of full-size scanners, but in a unique, disinfectant-ready enclosure.

SG20

Important hospital verification processes need not impact productivity. Minimize the time and effort to read barcodes with a speedy SG20 healthcare barcode scanner. Designed with ergonomics and the hospital environment in mind, the SG20 healthcare scanner features a housing made of disinfectant-ready materials.
