

## Our Termite Baiting Station Service Includes:

- The termite baiting system is placed between every 8 to 10 feet around the perimeter foundation of a structure.
- These Bait Stations will attract termites that would normally attack your home. The baiting station is inspected every 90 days, and in some cases, if applicable, we will treat your home for pest control at no cost.
- During the inspection, if termites are present the technician will replace the non-toxic cartridge with a non-toxic termite control cartridge.
- Adding a termite baiting system will add more insurance options for your home, and give you the highest prevention possible for your home.
