

CANYON FOAL OUT AND AFTERCARE

At Canyon we love seeing happy and healthy foals. That's why we do the work for you with in clinic foaling and aftercare for the mare and foal. With 24 hour foal alert notifications and immediate veterinary on site care available there is no reason for you to worry.

Our foaling package includes suturing of the foal alert monitor, post foaling exams for the foal and mare, foal immunoglobulin blood level assessment, and foal enema and naval care.

Before the due date, your mare will be turned out daily and stalled in our over-sized foaling stall bedded with shavings and cleaned at least twice daily. When she is close to foaling, she will be switched to a straw bedding stall, where she will safely foal.

Please contact us if you have questions or would like more information regarding our foal out package.
