

Hanging Systems

Light Duty

Our hook on system is ideal for pedestrian openings, lightweight trolleys and medium sized warehouse openings where forklift traffic is not present.

Heavy Duty

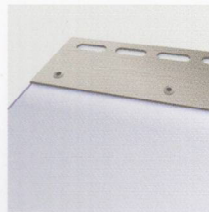

Our bolt on system is designed to take industrial wear and tear. Used for larger openings and a must for forklift traffic.

Sliding System

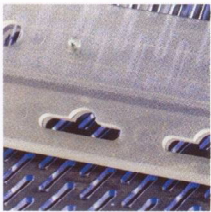

The perfect solution when a curtain becomes an unwelcome barrier or obstacle. Sliding options have many variations to suit most requirements, no matter how limiting the space may be.

Stainless Steel Plates

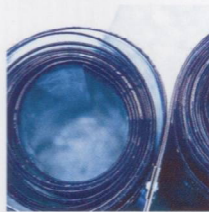

To be used in conjunction with our light duty hanging system.

Polycarbonate Plates

A budget alternative to our stainless steel plates. Used in conjunction with our light duty hanging system.

Replacement Strips

Bespoke individual strips can be supplied with or without fixing plates.

PVC Strip Curtain

Safety Screens Ltd are one of the largest stockholders of flexible PVC in Europe, offering the widest variety of grades and sizes in either bulk roll or cut strip.

We offer a nationwide installation service on all curtains, with our fitting team professionally representing your company anywhere in the UK.

Clear Standard

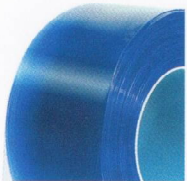

From small interior pedestrian doorways to large exterior warehouse doors, clear PVC is the workhorse of the family. Offers good light transmission and suitable for temperatures from +38C to -10C.

Perforated

A unique product only available from Safety Screens. Offers all the benefits of clear standard, but allows maximum ventilation both in and out of the premises.

Polar

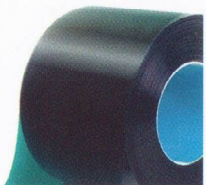

A must for all chilled environments, including cold stores, freezer rooms and refrigerated vehicles. Suitable for temperatures +25 to -25C.

Double Ribbed

"Bumper Strip" or "anti-scratch" is ideal for busy fork-lift traffic openings. The rib takes the impact from vehicles and goods, minimising damage and maintaining clarity and light transmission.

Welding

Minimises the risk of "welding flash" to other employees that may be in close proximity to welding. Available in red, green and bronze.

Coloured

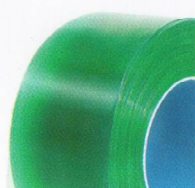

Available in both opaque and translucent grades. Please visit our website for the full colour range.

Frosted

For storerooms and warehouse where the concealment of goods or privacy is essential, whilst still allowing sufficient daylight.

Anti-Static

The perfect solution for data centre curtaining, or any other area where static charge is an issue. Helps to reduce the static charge as both objects and personnel pass through.
