

Stamped Concrete: Limitless Design Possibilities at an Attractive Price

Stamped concrete is the technique of adding color and texture to concrete for decorative effect. Patterns can replicate the look of bluestone, flagstone, slate, traditional brick, wood, and more. Choose colors that complement your home and landscape. Options are limitless. Concrete stamping prices often match or BEAT paver installation prices.

Other decorative techniques include adding border ribbons, artistic designs, and even treasures such as shiny pebbles or sea shells.

Contact Kessel Concrete Construction today for a free estimate on your concrete project.
