We provide a Watchdog Siren with every bounce house rental. Your safety is our absolute priority! The Watchdog should be in use AT ALL TIMES when the Bounce House is set up and inflated!

The **WATCHDOG™ Blower-Siren** helps prevent suffocation, dangerous falls and other common accidents caused by the **sudden deflation** of inflatable bounce houses.

The WATCHDOG™ Blower-Siren uses a patented smart chip that automatically detects if the blower is shut off or loses power. If it detects a problem, it sounds its 100+ decibel siren! This gives you precious time to help get children out safely.

- Circuit breaker failure detection
- Generator failure detection
- Unplugged cords detection
- Blower inadvertently turned off detection (child mischief)
- Rugged & durable ABS plastic
- Integrated cord management
- Powerful 100+ decibel siren
- Arming indicator light
- Internal battery that automatically recharges
- Stackable design for easy storage

True to its name, the new **Kodiak 1.5 HP** is B-Air's latest most powerful innovation in this **NEW #KP-1.5** design- engineered to produce 1290 CFM with 9.8 inches of static pressure while maintaining a low 8.8 running amp draw to run off a standard home outlet. **Every bounce house rental comes with this complimentary commercial blower /25ft power cord to keep the bouncer safely inflated and to keep your party jumpin'!**
