

COASTER ISO 9650

Compact, light, and cost-efficient life raft, suitable for coastal navigation

The interior ladder makes it possible to hoist oneself on board easily.

The peripheral strap, a Zodiac® patent, distributes the load when towing the life raft thus offering greater resistance than required by the standard.

Made of 100% bonded PVC fabric, the Coaster is resistant and visible.

THERMOBONDING™: Guaranteed quality

Born of aeronautics techniques, THERMOBONDING™ draws upon specific production processes that allow an inner and an outer strip to be bonded via hot air to the two edges of a buoyancy tube.

ADVANTAGES OF THERMOBONDING™:

- Perfectly watertight
- Excellent resistance of the assemblies
- Excellent resistance of the PVC fabric
- Optimised manufacturing control
- No glue used: more ecological and reliable

The Coaster is of Type II* and meets all the most restrictive criteria of the ISO 9650 standard. Specially designed for coastal navigation, it provides maximum safety while waiting for rescue at sea.

Made of 100% bonded PVC fabric, based on Zodiac® Thermobonding™ and high-frequency technology, the Coaster is both resistant and very visible. The structure of the tent, comprising a double crossed arch, offers ample room and guarantees perfect protection against the elements. The double arch, made of fibreglass, solidly holds the tent. The life raft inflates instantly when triggered at an ambient temperature between 0 and 65 °C. The delicate boarding phase is facilitated by the interior ladder. Once they are filled, the water pockets attached under the life raft serve as ballast (240 litres) and provide the Coaster with optimal stability.

These elements, a sign of superior quality, ensure the reliability of the Coaster ISO 9650 in the event of distress.

The Coaster ISO 9650 is available in three models that can accommodate four to eight people and are stowed in a container or a bag.

Zodiac® has a large network of approved stations that can perform the mandatory triennial inspections at very competitive rates. The Coaster is guaranteed for 12 years**.

*According to the ISO 9650 standard, there are two categories of life rafts: Type 1 for open sea sailing and Type 2 for coastal navigation. Beyond six miles from a shelter, possession of a life raft is mandatory. The choice of the type is left to the decision of the captain.

** Life raft guaranteed for 12 years under the conditions defined in the contract which can be obtained from your reseller.

EQUIPMENT

held in a container or suitcase and contained in a bag

Equipment

Rescue buoy + 30 m line	1
Floating knife	1
Sea anchor + line	1
Bailer	1
Sponge	2
Pair of floating paddles	1
Repair kit	1
Pump	1
Raft operating instructions	1

Signalling equipment

Hand-held flare	3
Parachute flare	2
Whistle	1
Signalling mirror	1
Electric torch	1
Spare batteries and bulb	1

Medical equipment

Seasickness tablets	6 / pers
Seasickness bag	1 / pers

When fully equipped, the **COASTER ISO 9650** includes all the elements which are essential to human survival during 24h.

MODEL	Capacity People	Compartments	Dimensions	Dimensions of the Container	Weight of the Container	Dimensions of the Bag	Weight of the Bag
COASTER 4P ISO 9650	4	2	144 x 144 cm	0,69 x 0,49 x 0,23	33 kg	0,67 x 0,45 x 0,22	30 kg
COASTER 6P ISO 9650	6	2	179 x 179 cm	0,69 x 0,49 x 0,23	36.5 kg	0,67 x 0,45 x 0,22	34 kg
COASTER 8P ISO 9650	8	2	201 x 201 cm	0,79 x 0,49 x 0,29	42 kg	0,72 x 0,45 x 0,26	38 kg
